PRESS RELEASE

Joint Press Release: OASES and KeepFlying Announce Strategic Partnership to Provide AI-Driven Solutions to Aviation Industry

9th October 2024 – OASES, a leading provider of MRO (Maintenance, Repair, and Overhaul) software, and KeepFlying, an innovative AI and aviation solutions company, are proud to announce a strategic partnership. This collaborative effort will deliver advanced AI-driven solutions to enhance efficiency, reliability, and safety for OASES' global customer base.

This collaboration will integrate KeepFlying's cutting-edge AI technology with OASES' industry-leading MRO platform. This integration will provide customers with AI driven CAMO & Tech Records functions, bid-to-cash MRO workflows, Engine Asset Management, Inventory & Supply Chain optimization to revolutionize aviation maintenance processes.

Sriram Haran, CEO of KeepFlying, commented:

"Partnering with OASES is an exciting opportunity to showcase how AI can transform aviation maintenance. With OASES' deep expertise in MRO software and our AI capabilities, we can unlock new insights and efficiencies that were previously unattainable. Together, we are setting a new benchmark for innovation in the aviation industry."

Paul Lynch, Group Managing Director at OASES added:

"The potential gains for businesses in leveraging their aviation data cannot be overstated – but it's not enough just to have these data – the value comes from putting them to work. Therefore, we are excited to partner with KeepFlying, a pioneering AI empowered organisation. We are confident that our customers will appreciate the benefits this collaboration will offer."

The partnership marks the beginning of a new era in aviation maintenance, where data-driven decisions and AI-powered tools will shape the future of MRO operations.

About KeepFlying®

KeepFlying® has been a leader in the delivery of AI and ML solutions since 2020. With a commitment to delivering the very best solutions utilizing the recent explosion in AI enabled technology, the company serves Operators, Lessors, Asset Owners and MRO Facilities worldwide.
